

BOOTH MASKING FILM (BMF)

ET/BMF-W80W, white
 ET/BMF-W80TR, transparent

Product	BMF is a 5+1 layer protective film in roll for protection of spray booths internal walls from overspray, dust and dirt.
Substrates	Spray booth OEM panels, painted and fully cured.
Surface Preparation	Walls must be completely dry, free from grease, dirt, dust and overspray. If needed, sand the surface with abrasive non-woven pads, clean with tack cloth and degrease. If needed, sand the surface with abrasive P240.
Application Conditions	18-22°C
Protective layers	Five numbered layers PP 20microns. Size 0.75m x 80m (60sqm).
Release protective layer	BOPP - transparent 40 microns.
All five protective layers	Light tacky coating for better dust retention.
Temperature Resistance	up to 80°C
Gross weight	10kg with ± 5% tolerance.
Life span	up to 12months after application.
